

Pelmorex National Alert Aggregation & Dissemination System Official Document:

Title	Alert Message Attachment Types
Document Type	Policy / Rule
Description	Identifies restrictions placed on the type of Alert Messages Attachments supported by the NAAD System.
Date	Effective June 9, 2010
Version	1.0
Replaces	n/a
References	n/a

There are no specific restrictions as to the type of Alert Message Attachments that the Pelmorex NAAD System is designed to support.

However standardization of Alert Message Attachment types will facilitate the efficient development by third party vendors and suppliers of automated systems designed to broadcast Alert Messages over radio, TV, cable and satellite. Therefore the Pelmorex Alerting Governance Council has adopted the following restrictions as to the type of Alert Message Attachments:

1. Audio file Attachments, if included, must be in one of the MP3, WMA or Wav. file formats.
2. Image file Attachments, if included, must be in either the png or jpeg file format.

Authorized Government Agencies are responsible for ensuring that their Alert Message Attachments comply with these restrictions.
