

Pelmorex NAAD System: The National Alert Aggregation & Dissemination (NAAD) System will be updating the versions of CAP-CP and Statistics Canada Standard Geographical classification codes used when issuing Alert Messages.

Update to occur Spring 2012

NAAD System Policy June 2010	New NAAD System Policy Spring 2012	Comments
Common Alerting Protocol, v. 1.2 as published by OASIS	Same, no change	No impact
CAP-CP Introduction and Rule Set Beta 0.3 Dated May 6, 2009	CAP-CP Introduction and Rule Set Beta 0.4 Dated October 24, 2010	Minor update as a result of CAP 1.2 release. Also allows government users to define their own “layers” allowing additional customized information to be included in CAP-CP alerts. For example, this would allow Environment Canada to include information unique to their needs within an alert message.
CAP-CP Location References Beta 0.3.A Dated Feb 7, 2010	CAP-CP Location References Beta 0.3.B Dated October 24, 2010	Beta 0.3B references the most recent Statistics Canada SGC codes [see below] and also allows for use of the value <none> in conjunction with a polygon for locations outside of Canada or a marine area.
CAP-CP Event References Beta 0.3.A	CAP-CP Event References Beta 0.4 Dated October 24, 2010	Minor corrections & additions
Statistics Canada - Standard Geographical Classification 2006 Updated May 2009	Statistics Canada - Standard Geographical Classification 2006 Updated May 2010	Minor changes and corrections to a small percentage of the boundary files.
