

Pelmorex National Alert Aggregation & Dissemination System Official Document:

Title	Alert Message & Attachment Size Restrictions
Document Type	Policy / Rule
Description	Identifies restrictions placed on the size of Alert Messages & Attachments to facilitate broadest possible distribution by Broadcast Distribution Undertakings
Date	Effective December 30, 2011
Version	2.0
Replaces	1.0
References	See also Alert Message Attachment Types

Restrictions:

There are no specific restrictions as to the size of Alert Messages and/or Attachments that the Pelmorex NAAD System is designed to support. However in recognition that certain Broadcast Distribution Undertakings such as cable and satellite TV systems have legacy equipment that may not support large Alert Message files, the Pelmorex Alerting Governance Council has adopted the following file size restrictions so as to enable the broadest possible distribution of its Alert Messages.

1. The cumulative size of all file Attachments in any single Alert Message must not exceed 800 Kbytes prior to conversion to base 64.
2. The size of any single Alert Message, including all file attachments must not exceed 5 MBytes prior to conversion to base 64.
